I saw it today and I enjoyed it. Granted, it could have had a better plot. But hell, I'm there for the mutants and fight scenes anyway.

Who was the chick with the purple hair with Callisto near the end? The one who went through the wall?

And wasn't Arclight Iceman's sister in Spiderman and his Amazing Friends?

Did anyone else think it was weird that the Prof didn't even give Cain a glance?

Glad to see Moira and Multiple Man. Where was Jubilee? She was credited but I guess i missed her. And Rogue? Happy they added extra muties. Hope there's another one with even more chracters... and a plot.

I'll be seeing it again.

And I loved Wolvie's line "Grow those back."
