There were a few confusing parts, well when i say few I mean the whole damn movie.. Though I understood most of it cause I cheated and read the book based on the screenplay before the movie came out. But the movie did the xmen justice just a few bad eggs. Most of them being all the xmen that were baddies, bah.

The real drawback was my enthusiasm from the end of the book and the expectation of it happening in the movie... Completely different after the credits ending. Because movie, was ok ending buuuut the book badass cause well it had New Mutants such as Gambit, Danielle Moonstar, Sage, and my all time favorite CANNONBALL. That and the quote "Most of the kids here are mutants that will leave this school and go on with their regular lives, you are the chosen few to become Xmen"
