D'oh

In fact, I meant Adriana Lima. (that's what I get for writing comments while fighting with Poser 7's cloth room.)

BTW, do you remember the name of the model the body belongs to?

About V4's private morphs, all I've found by now is a morph from Ulli3d (he's great... but you can't draw blood from a stone!) and a work from genitals-expert Arduino, but as he says on Renderotica, because of V4 having even fewer polys in her (almost) private parts than even V3, all he could come out with was a genital "mask" to put over her hip, just like we had at the age of Victoria 2... IMHO it's a shame that such an accurate (and expensive!) model lacks such an important feature as human genitals. But that's just my 2 cents.

As by now I prefer Sydney and Miki, they're two great realistic (and anatomically correct) models!!
