In an old post, I mentioned that I had a copy of a picture of Madonna as the She Hulk and since it was not my picture, I couldn't post it. I was googling pics of her and I found it again. The thing is: it's actually part of a Star Trek web site turning popular and obscure actresses into Orion slave girls (green skin, red eyes...). It includes Nicole Kidman, Christina Applegate, Christina Ricci, Reese Witherspoon and a majority of ladies I've never heard of. Anyway, you can find the link here and check it out for yourself:

It's actually really good photo manipulation.
