Hisstoryman: Everyone has a different scale that the 1-10 represents. To some ppl a 6 can represent ?I think this is about 60% of the awesomeness that is Android's work? (Remember 60% of infinite is still infinite.) To others a 10 can mean ?I feel really sorry for this guy.? Ratings like that are best used as a rough guide. An 8-10 means people generally like it.

My suggestion is to pay more attention to the comments. You know you've made an impression when someone takes the time to write comments.

StarChild: Knowing that people enjoyed seeing your work is the payoff since this isn't a for profit site. And in many ways an honest critique can be the swift kick in rear you need to live up to your potential.
