im not saying that i dont need an update until i do have the money to do so i can only do so much its not that i can't relate to trying to be creative on a low/no budget..but that's really a cop-out. there's plenty of quality freebies out there if you take the time to look for them. hell over 75% of my runtime is freestuff. i think what jr. mcsheepman is saying that you need to practice utilizing what you have. what program are you using? i'm sure that i can help with the quality of your work if you're willing to learn.
