Now don't get this wrong as I really like the WB's "The Flash"

Or at least the few episodes they have aired so far.

I also understand some of the change-up for TV's sake.

With that saying,

Yes Simmon Stagg was a greedy industrialist in the comics but I don't believe he was ever Killed off by anyone in the Flash universe and

Just who is the scientist guy at Starlabs in the wheelchair who killed Simmon Stagg.

Is there going to be an intro for Metomorpha or is that going to be the Girl scientist at Starlabs boyfriend who died trying to shut down the particle accelerator.

As an quick cell shot of a damaged cage with the name on it GRODD ... Did any one else notice other hints of maybe things to come?
