Good thing about Paint shop leeta, is that unlike the stingy butt Photoshop that only knows how to save in a few file formates. Paint shop pro lets you save in and open ANY file format including Photoshop. :)

Are you sniffing glue DW, Photoshop can save in more then one way. I can save any image in the following formats using my Photoshop CS

psd, pdd, pix, bmp, rle, dib, gif, img, ei, eiz, eizz, eps, iff, tdi, jpg, jpeg, jpe, jpf, jpx, jp2, j2c, j2k, jpc, pcx, pdf, pdp, raw, pct, pict, pxr, px1, png, pbm, pgm, ppm, pnm, sct, sgi, rgb, rgba, bw, pic, tga, vda, icb, vst, tiff, tif, & rla

and then the save for web option increases that even more

But really the psd file format is all you will need for your work before you are finished.
