Yup, That's The Sandman alright but as we all know as in some other movies there can always be more than one villain in a comic book superhero movie.

Less we forget J.Jonah's son by bringing back The Bloodstone from space was in fact the first Manwolf in the comics and in the animation series his space shuttle brought back the symbiote from space to become Venom?

Then there is always the presents of Dr.Connors who we already know is going to end-up as The Lizard but just when it will happen this movie or the next?

Rumors also run rampant about the appearance of the Black Cat in this movie?

So there are many other senairos to add in extra villain in Spiderman movies that you couldn't count them on two hands!

And God only know what they have in plans for Topher Grace?
