I Guess I'm Guilty Again!!

I took a naked model from the Adult Gallery, selected and colored the torso purple (after first smudging and manipping the body so that it would look like spandex when layered), then I put a new masked head on, then I used airbrush, then 1px line, then smudge again, then I selected and colored the gloves and boots, then I went over the edges with 1px lines, and I came up with a "quickie" after 2 hours on Adobe 3.

But I do appreciate criticism.
