We rented it and plan on watching it tonight. I watched the special features earlier. I couldn't wait to see what they revealed about X3... absolutely nothing! On her video diary, I got real tired of hearing Alba say "What we doing now guys?" Is she always so clueless?

I'm interested to see what they come up next for the sequel. There was no mention of it on the DVD. Maybe in the commentary, but I didn't sit through that.
