You Said Sai Si? Or Was That SUE Si? or was that SEE SI? sorry got fred hembeck on my mine thanks for input, i'll see if anymore comes up before finish it I took a little time to add more to the image I'll try to google up some images of Sais here is a more update sample of the image however i'm not going to do this for a few days been busy on other projects.

Where there is solid pieces is where photomontage sample shots are merged i did some samples of the shoes but dislike them all will probbaly find alternate metal. I already created one of the gauntlets so you can see how gauntlets are merged someone said they are to big on another image, trying to make them somewhat feminine (even if she is slashing your throat out with the swords hehe) the fur will be replaced its not in correct position but currently as a placemaker
