OK hopefully the comment bug is fixed. I had looked around before for a fix on this problem, I was at the xoops site and figure what the heck I am here anyway. I ran a search on the problem and came up with a few different responses. I do not know if the problem is fixed or nor but I have put in place 2 things that have fixed the problem for other sites.

Please let me know if this is still a problem for you as hopefully it has now been taken care of.
