It has it's fits with me. One day I won't have any problems. and then the next day every single freakin picture will have a problem. And it's not like the bug at boldcomicsstudios where, you typed, copied, posted/rejected, repost and be fine.

This thing is like post/reject, repost/reject, repost/reject, repost/reject, repost/reject, repost/reject, repost/reject, repost/reject, repost/reject, repost/reject, repost/reject, repost/AH HELL SCREW IT!
