Whoops, sorry.. Last reply was not in the spirit of the thread... So:

I don't remember how I found the site but I found it and was inspired to try a bit of manipulating. I tried an ugly manip, got a little feedback.. un-detoured I tried [another](#).. got some invaluable feedback for a newbie, and inspired by that... I tried a [do-over](#).

That push to improve and the support I got pretty much hooked me.
