Looks like we got some of you.

Congrats to all of you that figured at that the level one posts were fakes

For those of you guys that weren't here back then, Level 1 was in fact the first banning we ever had here at HM.

The funny thing was Myself and Brick have been planning this joke for a little while and all the text from our fake postings were copied and pasted from actual posts that Level 1 made on different sites

What a jerk off.

Anyway, not that I expect anyone to admit it, but who did we get?
