I have to agree with you on that one Chilly. Hey, I'm flexible, you manippers give me a good average amount of time needed and I will see what I can do. On the other hand, you could look at it this way, it's a challenge. I seem to remember Darkblade here at HM did 30 manips in 30 days, so it can be done. He wasn't matching it to a drawing though. Takes time to find a model with the right pose and the pieces needed to fit...soooo, gimme some feedback on this.
