I have used the name Logan or XLogan for over 10 yrs, in e-mail addresses, chat rooms, etc. Recently, my mom asked me what it meant. Thinking quickly, I showed her a Marvel Legends Logan figure, pointing out the name "Logan" on the front. She then asked about the "X". I said it is because he is an "X"-Man. She still looked at me like I was crazy. And don't get me started on talking with my Dad...

As to music, a couple of yrs ago, a new coworker (who claimed to be a former DJ) put in a dance mix CD. A dance version of Bohemien Rhapsody (with a female singer) came on, and he bragged about how great the singer was. My friend Dawn and I just burst out laughing because he was totally clueless that the song was originally by Queen....
