Voltron asked if there was a FREE alternative to LightWave.

My lord, god, the almighty.....Google says it's called Blender. Which incidentally, they claim to be better than 3DSMax, too.

<http://www.blender3d.org/cms/Features.155.0.html>

Also of note. While digging up Terragen I ran across someone using Forester. So I got curious and..... It's another freeware landscape generator.
