By the looks of it you either love it or hate it, me? I'm in between. I was hoping for a cool evil lex but he's still after the land thing like in the first. As for the acting and what not, no major complaints, Brandon Routh fits just right for Christopher Reeve, could have cast someone better for Lex as in looks but Spacey did act like Gene Hackman and Lex from the comics just right amount. Now as for the kid I'm going to say he's a metahuman not Superman's kid.

In one word here's what I think should happen for Superman Return 2 "Brainiac". And then for the 3rd, you'll never guess, SUPERGIRL. Sticking close to Superman/Batman #8-#13 but replace Darkside with Lex and no Batman, at this point. And then a Supergirl movie, oh yea.

Just want to add the little things I saw/heard like the kryptonite that Lex steals had the date 1978 (year the 1st Superman movie came out) Gotham heard on the news, the kid was wearing Aquaman pjs
