I Hate to Bring Up a Dead Subject (e.g., roadkill, fish, etc.) But...

The Lady Heromorph Picks thumbnails are useless. I used to like to see which picks the Lady (slut) liked, and I could see the thumbnails for those to re-visit or those I had missed. I haven't bothered to hit the "thumbnails" for a month because it's not worth my time going through dead animals (etc.)

Please either return to the old format or at least give a text list of the picks of the week. (It's not like I think Jr (or the "Lady") is an asshole or something.
