Never had Dail-up, so I also don't know the fun involved.

I could have gone with the Fast Shaw TV fast cable modem.

I have a cable phone line High Speed ADSL-300G and it's fast!

Combine that with my i-Next.xp2600+ Athlon cpu by Tagar Industries and it all seem real fast.

Say what does 120.0GB 7200RPM,ATA100 mean anyway?
