You're not very good at choosing base pictures Neil, so I have to wonder why you do it so often. Of 6 links 2 are forbidden. A further 3 are too small and the last has text over the model. Three of them are wearing heels, there are no heels on Dagger's costume so the model would be standing oddly when they were removed. To do Dagger's costume correctly the breasts on the base pic need to be bare - it would take a lot of work to fix up these pictures.

Dagger is a young woman who wanted to be a ballerina. She ran away from home as a teenager and since then has been fighting crime at night. She would be graceful, probably not be smiling and have pale skin (from sleeping all day).

None of them suit Dagger.
