I read something somewhere, but can't remember where that The Jungle Book was getting the classic novel to comic book treatment by Marvel or Dark Horse or one of the other big companies that are all into this novel to comic book kick right now. If this is true, I would love to check it out since that is my all time favorite book, and much much better than the silly Disney version, and as much as I like the silly Disney version, I'd rather see a serious comic book adaptation according to the more serious original novel. Lord of the Rings and other Tolkein books would be great to see in comic format as also would many of the various Star Wars novels of late.
