something about the leg behind the bike kinda bothers me. it just kinda disappears further up. To me at least.

Also, I keep looking at the bike and my eyes say three quarter view. Then I look at the gun on the front and my eyes say total side view. Same thing with the console. I either want to pull it down and right a lil or hide it more.

Just out of curiosity. The dots in the back. What are they for?

Not tryin to dog your work. Just sharing thoughts.
