Cockrum was the artist who took the legion and modernized them (for the 79's at least). before him the costumes were blah and lacked real originality.

he updated the look of all the Legionaires and made them look more teen like than before.

some of the favorites from the era that everyone should recall would be the Pink Bikini on Saturn Girl (I know you guys know that one) and the Bustier (god that was horrid) on Cosmic Boy. He also came up with the more feral look to Timber Wolf which was later incorporated into Wolverine.

Yall can never mind the request anywho, got a friend of mine to do one for me.

thanks anyway.
