Looking at it I am thinking another Godzilla movie.

The problem with the studio keeping it a 'secret' and creating all the false hype is that they might have made a crap film and are trying to compensate.

Nope, I disagree.

I think it is Giant Robot time, time for Anime to recognize it's roots.

Therefore, here is this class' reading list for the semester:

Mazinger Z

Grendizer

Dangard Ace

Getter Robo

Macross

Southern Cross

But, who knows? I could be wrong, this is a guess.
