I'm glad that there are other people as confused as I am about this one. I saw it before Transformers also, and I told my wife about it and she is a marketing professor and she said that by not mentioning the name of the movie that they have created a very successful marketing hype since now everyone is talking about this nameless "giant monster movie". I suggested that it might be a Godzilla sequel or possibly even Jurassic Park 4, but I'm probably wrong. It would be cool if it was another Japanese monster like Mothra or Rodan though.

Why does it have to be a Godzilla monster... those are all worn out and old... I would like to see a new monster of sorts... A giant Lion did sound cool... Or a giant Gary Coleman....
