Learning the technique that Jr describes is worth more than the free high quality image source you seek. In a short time not only will you gain improvement, but you will no longer be limited by the images you find.

Amen Bio.

Yes, The pen tool and the smudge brush will make any image "HQ"
Take this one for instance...

The original image of this was around 600pxl wide. I simply Enlarged the image... both in DPI and Screen Resolution (they do go hand in hand... kinda) then I laid a path all the way around her body, created a selection, and got to smudging. In a matter of an hour or so she was nice and clean and High Res.

I don't want my manip projects to suffer setback.

Sometimes manips take time... none of your manips will suffer a setback.... they will just take a td bit longer to complete... and that isn't a bad thing.
