I just hate adding numbers to my screennames or email addresses so I tried to come up with something to reflect my habit (netsurfing) that wasn't taken or would require numbers. I was reminded of Gary gnu and no Gnus is Good gnus or something like that from some show i watched as a kid, and there you go. Gnetsurpher! With a ph instead of f, because... um..... because ph IS the new F, as in phat! Ok, that works.
