We recently Banned the member named Souperman for violation of the posting policy, an image was posted in the adult gallery that contain a photo of a child watching a sex act. I want to take this opportunity to remind everyone that posting photo-based images that contain pictures of children will not be tolerated at this site! period. I do not care if it is a non-adult related image. Any image that contains the photo of a child will not be tolerated at this site. And the poster will be banned with no chance of a case review. For 2d and 3d artists do not post any adult material that shows under-aged people in adult related images. If we have anything like this happen again I will remove all adult material from this site and the members gallery will be a thing of the past. If you are unsure if you should post a image because of the content as mentioned above, then do not. I hope I have made myself clear.
