Pepper?

Whaaa??? Is Pepper her name in the movie? As you can probably tell, I know nothing about Iron Man. Always thought he was kinda goofy. But a good superhero movie is always fun!

Why does Downey Jr. look like the bearded lady?

Maybe they ought to switch roles.

And I can't believe that is Jeff Bridges. It looks nothing like the Dude. Yep, JR, Tony's original secretary and love interest was Virginia 'Pepper' Potts, an extremely hot redhead in the mold of Jean 'Marvel Girl' Grey and Mary Jane 'Future Mrs. MF' Watson. I'll definately go see this one when it comes out but I only pray that it won't suck. [Notice they haven't released pics of the Mandarin yet? Not a good sign.]
