I've seen alot of good poser stuff and want to try it out I got my hands on a copy of poser 7 but don't know crap about modeling. Any key sites with tutorials? I wanna do stuff like Toxic Angel from renderosity below is a link to his gallery:

http://www.renderosity.com/mod/gallery/browse.php?user_id=17015

Oh and do the models and textures and props from previous versions work with Poser 7? Any help is appreciated.
