I am a Poser 7 user, and love the program. I never had any problems importing content from P6 to P7, I couldn't tell you from earlier versions than P5. Bear in mind that some of the newest content is specifically made for P6 or above due to their material shaders. Toxic Angel does do some killer work, but he only uses Poser for the figure, everything else is postwork, a testament to his skills. If you're looking for 3D modeling, I'd use Carrera, Hexagon, or Shade. Poser isn't really made for modelling, more for human figures which it excels at.
