Well I'm strictly a DAZ Studio 1.8 user myself although I do also have Poser7 eventhough I just use it for the content [I haven't gotten the hang of operating Poser yet]. Like Winter said, Daz 3D and Renderosity are great sites to acquire free content. But if you are serious about 3D I would suggest you join the Platunum Club at Daz. You get a year's membership for \$100 and receive great discounts on top selling 3D stuff [as low as \$0.89 during the sale they have going on now]. You can also try Animotions, they have a great download section with tons of stuff, the majority being for superheroes. Content Paradise also offers some cool freebies as well
