Alot of you have already seen this, but it's no longer in my gallery. And I figure there are some who haven't seen.

Anyways, either Tartanninja or Bluebeetle3 had done a 3d model of the Joker and I disagreed with it. So I was asked to show what I thought he was sposo look like. I think I nailed it.

The other reason I put this here is because Vagabond just did a cape study and it reminded me of the bats that I did.
