If killer robot Terminators all looked as good as Summer Glau, then we'd be running with open arms towards Judgment Day. But till that mushroom-clouded day comes, your best chance of meeting the actress who plays the arousing automaton on ?Terminator: The Sarah Connor Chronicles? will be at Wizard World Los Angeles on Saturday, March 15. Glau will be on hand for special signings and more at the LA Convention Center!

Summer Glau (?Firefly?) as the latest cybernetic model designed to protect John Connor from harm.

I went in and read several times and I know my training helped because of all the martial arts. That's a big part of what I do, in terms of character.
