I was directed to a neat site with a good bit to offer: [Character Designs](#).

They have a ton of photos with alot of varying poses under the Photosets, nice textural items for sampling under the Textures link, and some potentially nice stuff under teh events link - like shots from swimwear shows, anime shows, etc.

There are also a few sketch tutorials. I'm sure there's more I haven't looked at yet, but thought it might be a good source.
