Is it worth buying or just renting?

Well I collect animated movies, so I HAD to buy it. Should you buy it? I guess it all depends... the price I paid was OK compared to other stuff. Would you want to pay a couple bucks to rent, then decide you want to own it, and then end up spending more money on it overall when you buy it? Maybe just rent it for now, then look for a used copy at Blockbuster in 3 months.
