I liked the movie but I was disappointed in some of the things that were left out or only barely touched upon from the graphic novel. This movie is based on a limited series which is now collected into one volume done by Darwyn Cooke. He's the artist thats doing the new Spirit series. At least up to #12 from what I hear. The 'New Frontier' book is AWESOME! But like I said, the movie is good but leaves out some of the stuff I liked in the book. Which is understandable since alot of the stuff it leaves out contained characters most people have never heard of from the really OLD days of DC. Admittedly I had only a passing knowledge of them until this book. The visual design is very close to the book except that they couldn't spend the time on it that Cooke did so its more simplistic. My wife is a big WW fan and she didn't like this version either.
