Hey guys!, sorry I havent been around. I have a tip for you guys, if you look up (Brian Haberlin's) tuts on evrything from dig inking to color and so on you guys would find it helpful. a little history on brian he is a editor and chief to start and has done work for Marvel DC Image Comics and others, he also pencils and inks the spawn monthly

hes a gold mine of info and his vids are pretty straight forward. I could try to find the links and post them for you all, there are a couple of free ones and if you like them there are more indepth ones to buy.

they are based on Photoshop and Painter pro, as these are the packages the industry uses anyways just Pm me and I can see about finding the links unless someone here already has the links.

CHEERs.
