How do you resize pics? I have a couple I'd like to add here but it says they're too big. Little help?

That depends what kind of program you're using: If it's Photoshop, on the menu "Images" you'll find an option to resize the image. But I think almost every program have that option...

Not sure because I've only used Photoshop, Paint Shop Pro and Gimp but all these 3 had the option to resize.

Hope it helps.

And don't forget to optimize your images so that the file size will be accepted also.
