Hi all,

This may sound like a strange request but I need your help. I am looking for an aircraft aluminum skin background for a series of nose art renders I want to do. It will need to be in color either bare aluminum or painted is fine. I wouldn't normally ask for help with this but my internet is so slow over here, think really bad dial up at times!, that I am posting this here in hopes that you all can help me find what I need. You can post what you find in the cookie jar if you can, or drop me a PM with a link.

Thanks

MC
