I don't care who plays Catwoman in the Batman movie... but I would like to see AJ dressed up in a catwoman suit! Meeeyooooowwww!

1st off, I have to agree with our resident "Federal Pervert Protection Program" member; Angelina Jolie would be heart-stopping in a latex 'Catwoman' suit.

2nd...why does this feel like the start of another "Who do you think should play Wonder Woman?" thread? Or am I just feeling a leetle bit paranoid?

Finally, I wish all contenders in this years' 'Smackdown' the very best. Just watch out for the "Heromorph Dirty Tricks" department...ya never know when or where THOSE boyos will be popping up next...
