Ok,I wasn't sure which program is most popular,I thought it might be ZBrush,but someone who has alot of experience with any of the major 3D modelers,I'm relatively sure I can find most of them,which program is the most popular?

From what I see around here, probably Poser or/and Daz.

I personally am trying to learn a little more about 3D using Daz. It's easy to learn and with a lot of figures or models and the best is: It's FREE!
