I was looking for something similar myself recently. The problem I ran in to with windows movie maker was that I could only save the video as a wmm project file. I did find something that let me save as an .avi though -

Yep, it worked for me, Daruma. I tried Wolverine 107's idea of HJ Split...but, it could not locate them. This, however, did a fine job of hooking them together. Now, I can watch all three "Ilsa" movies without pausing to open another folder. (Big Dyanne Thorne fan...Maximum M I L F with HOOTERS!

) Hope my copy of Nero 7 can burn them onto dvds for me

Thanks for all the help, Brother HM'ers
