I'm at the end of my rope here. I've been trying to do an Avengers image for months now, but several factors keep standing in my way.

1. I've got the costume texture for Captain America and his shield, but I can't find the damned head wings ANYWHERE.
2. I've got a decent looking Thor built up, but it's Ultimate Thor and I'm going for CLASSIC Avengers here. Trouble is, nobody seems to have ever, in the history of the M3 figure, made a texture for Classic Thor.
3. Thor's Hammer. I found a decent looking Mjolnir over at www.animotions.com, but I can't get the damned thing to work. It won't load at all, and it makes Poser freeze with me unable to save my work. I've gone through 2 different versions of Thor because of this.
4. Wasp. Got a good costume texture for her courtesy of our very own Peter Cotton. However, the wings simply do not exist for download anywhere anymore.

Hulk and Iron Man I've got covered.

If anybody has any textures they've developed, or props they'd like to share, or even links to any props and/or textures that will help me out, I'd GREATLY appreciate it. You will be helping me to get rid of a three month long headache. For those that have what I need, my email address is thestarkiller01@yahoo.com. I appreciate any and all help I get on this, and I'll be keeping a list of the people who helped me and what they helped me with so that I can credit you in the final image.

Thanks for reading this and I hope you can help me.

p.s. Disregard #3. I got it working, but it would've taken too more time to erase and renumber everything than it would for me to just type this little p.s.
