well, on cap's wings i got nothing. the best i can say, is to find some posable or propped angel wings, and scale them down to fit. or go for ultimate cap, but since you already said you weren't, guess thats no help.

for the wings, i honestly can't remember where i found them, and since i lost most of my library with my computer change, afraid i can't help you out there. best i can say, is look for something like 'aiko fairy wings' on rendo or Google, as aiko and fairy seems to pop up some good sites.

well, on the hammer i dunno. depends on how realistic you going for.

I'd say take a break from it, ignore it completely, look for replies here, and just...well...wait for the opportune moment.
