GLAD TO COME TO YOUR RESCUE.

[http://www.daz3d.com/i/3d-models/-/creature-creation-pack?item=39&spm=ab&\\_m=d](http://www.daz3d.com/i/3d-models/-/creature-creation-pack?item=39&spm=ab&_m=d)

daz3d has a creature creation pack that has some wings that would work for the wasp.

for caps head wings, if you look, most images for the flash and cap both have similar wings, just change the color, position and your set. they would be pretty small anyway so most would not notice a difference.

hope this helps. :D

if you need help with anything, let me know. be glad to help do what i can.
