Majel Lee Hudec (born 23 February 1932), better known as Majel Barrett or Majel Barrett-Roddenberry, died today, 18 Dec 2008. She had leukemia.

For thos of us who first encountered science-fiction through 'Star Trek', this passing will be of great sorrow. Even those who were into S-F before "Star Trek" (me, for example) acknowlege the contribution Her and Her husband, Gene Roddenberry, made to the scene.

She will be greatly missed...
